

1 Email Phishing

Is this email really from my bank?

Don't click on links or open attachments in suspicious emails. Verify the sender before you trust.

2 Fake Websites / Fishing

Enter your password

Hackers create fake websites to steal your passwords, PINs, and personal information. Always check the URL.

3 Social Media Scams

Too good to be true!

Scam!

Don't believe everything you see online. Think before you share or trust anything.

4 Fake Profiles

Cool Alex

Not everyone online is who they say they are. Don't share personal information or photos with strangers.

5 Unauthorized Calls (Vishing)

Your account will be blocked! Share your details now.

Share

Don't share personal or bank information over calls or messages from unknown people.

6 Banking Frauds

Your OTP 123456 is for your bank transaction!

Never share your OTP, PIN, or CVV with anyone. Banks never ask for it.

7 Online Shopping Scams

Super Deal! Limited Time Offer!

BUY

If a deal looks too good to be true, it probably is. Check reviews and website authenticity.

8 Viruses / Malware

Malware can damage your device, steal your data, or lock your files. Always use updated antivirus software.

9 Data Breach

DATA LEAKED

Even a small security leak can expose your personal information. Be careful what you share.

10 Social Media Addiction

Just one more reel... Oh no, it's late!

Tap to claim

Too much screen time can affect your health and studies. Use social media wisely.

11 Ransomware

Your files are locked! Pay to unlock your files or they will be deleted!

Don't click on unknown links or attachments. It could lock your files and demand payment.

12 Identity Theft

Your personal information can be stolen and used in your name. Protect your identity.

13 Camera Hacking

Hackers can access your camera and spy on you. Cover your camera when not in use.

14 Locating Tracking

Hackers can track your location through your device. Check your app permissions.

15 Fake News / Hoaxes

Is this news real?

Don't believe or forward unverified news. Fact-check before you share.

16 Gaming Scams

Free Diamonds? Really? Click here to claim!

Free rewards are often a trap. Don't share your gaming ID or personal information.

17 Tech Support Scams

I'm from Microsoft support. There is a virus on your computer. Allow me to fix it.

Fake tech support may trick you into giving access to your computer or paying them.

18 File Sharing Dangers

Downloading unknown files can infect your device with viruses or steal your data.

19 Password Hacking

PASSWORD

Use strong, unique passwords and enable two-factor authentication.

20 Online Blackmail

I have your photos/videos. Pay me or I will share them!

Never share personal photos/videos. Don't respond. Block and report. Tell a trusted adult.

Follow These Cyber Safety Tips

- Use strong passwords and change them regularly.
- Think before you click on links or attachments.
- Don't share personal info (phone, PIN, passwords).
- Talk to a trusted adult if something feels wrong.
